Performance Mechanical, Inc. (PMI) can manage a complete range of civil construction projects as your single point of contact to keep your projects on schedule and cost-efficient.

We offer certified and trained experts who understand what's needed both underground and aboveground, to help add strength and longevity to your operations.

A Full Range of Civil Construction Services

Whether your project involves demolition, excavation, grouting, restoration, or retrofitting, we can deliver all your civil construction needs, including:

- Excavation and compaction
- Complex reinforced cast-in-place foundations
- Concrete curb, sidewalks, overlays, and repairs
- Reinforced slab-on-grade placement and finish
- Rebar installation
- Underground utilities
- Large mat foundations
- Helical piles
- Drilled piers
- Demolition of existing foundations
- Asphalt patching
- Precision anchor-bolt and embed placement
- Site restoration
- Retrofitting existing foundations to fit new equipment

- Cementitious grouting
- Below-grade sump basins
- Chemical containment foundations
- Epoxy grouting for rotating equipment
- Structural grout shims
- Engineered form systems

Certified and Trained Excavation and Shoring Expertise

When you need civil construction for pipelines, manholes, drain basins, or vaults, it's valuable to know we've earned Gold Shovel Standard certification, to demonstrate our commitment to safety and to the integrity of your buried infrastructure. We're also OSHA Competent Person trained in shoring and excavations.
