For over 30 years, Performance Mechanical, Inc. has been delivering process and utility piping services for regulated or complex process systems in an array of manufacturing and industrial applications. We understand the critical nature of hazardous and corrosive process fluids. We also have the ASME stamps for pressure piping (PP) and power boilers (S).

Solutions for Your Systems' Unique Needs

Count on us to fabricate, install, modify, and test piping for ammonia, brew quality, chemical process, compressed air, condensation, food grade, fuel oil, gas, hydraulic, steam, water, and more. Customizing to your unique plans, specifications, and code requirements, our project capabilities include:

- Custom spooling
- Detailed design services
- Pipe supports/systems
- Pipefitting and welding
- Pipeline welding (API 1104)
- Piping demolition
- Hydrostatic pressure testing certified
- Process systems and piping installation
- Shutdowns/outages
- Steam/condensate piping
- Structural steel platforms, catwalks, handrail
- Utility piping installation
- Value engineering/constructability
- Piping systems in accordance with ASME and API standards and specifications.

Experience with Your Type of Piping

Whatever your systems require, we offer expertise in a range of materials, including:

- Stainless Steel
- Carbon Steel
- Chlorinated polyvinyl chloride (CPVC)
- Chromes
- Duplex
- Alloy 20
- High density polyethylene (HDPE)
- Inconel
- Nickel
- Hastelloy®
- Moly
- Aluminum
